

How to gather and submit evidence of **illegal firearm activity**.

The best way to submit evidence is to take it to your local police station.

COMING SOON · THE SHIELDPNG EVIDENCE REPORTING SYSTEM

We are in the final stages of setting up the ShieldPNG Evidence Reporting System for those unable to submit evidence directly to the police and wish to submit it anonymously.

Submit

There will soon be a range of ways to submit, including an online form and email.

Online form

Email

WhatsApp · soon

Stored anonymously

Evidence is entered into the ShieldPNG Evidence Database. This Evidence Database does not record the email address or name of any person submitting the evidence.

Police action

A limited number of police personnel selected by RPNGC HQ will be given access to the Evidence Database and only they can see, download and pass on information recorded in it that they believe is actionable.

Additional anonymous reporting options are being set up, including through WhatsApp.

If you wish to include your name and contact information, you need to contact the police directly.

To be useful, evidence needs to be clear and detailed. It should include all information that you can about who committed the offence(s) and how that can be proven. **Photos and videos of them doing it are the most useful.**
